Information

Why we advise the use of the 20 candle Tungsten Lamp when the 20 candle carbon lamp you are using requires two or three times as much current?

Listen! You will use at least one 32 candle Tungsten which uses less current than the 20 candle carbon and maybe a 50 candle Tungsten which takes the same current as the carbon. Your home will be vastly better lighted for a reasonable price and your satisfaction will get us your neighbors' business. We prefer two satisfied customers with Tungsten lamps to one or less with carbon lamps.

The large size Tungsten lamps now light practically all the business houses in Vinita. The small size will shortly light as great a percentage of the residences in Vinita.

Let us estimate the cost of wiring your house.
